PRESIDENT'S MESSAGE

Shri P. K. Taneja, IAS (Retd.)

President, GSFCU

It gives me immense pleasure and parental pride to welcome every one of you to this auspicious occasion of GSFC University's 3rd convocation. I extend my heartfelt congratulations to all of the graduating students that will get their degrees today. I wish to express my sincere congratulations to the students who will get gold medals and their parents for their outstanding achievements. As we all know, the New Normal following the pandemic has forced us to go virtual, and students will lose out on the opportunity to clamber on the stage and fling their hats in the air. However, we will continue to have virtual fun to remember the same event in a unique way.

I am delighted to report that GSFC University has developed an excellent ecology for pursuing higher education in a relatively short period since its establishment. As a result of this approach, the university has developed a competitive academic and research curriculum structure and a dynamic learning environment that attracts students to pursue higher education in a variety of undergraduate and postgraduate degree programs. In fact, we are launching a handful of new programs at the institution this year that will give students more alternatives. Our university is dedicated to providing a comprehensive teaching experience for students, as evidenced by the virtual and blended learning initiatives conducted during the last year and a half.

I wish all the success and grandeur in your future endeavour.

PROVOST'S MESSAGE

Dr. Nikhil Zaveri

Provost (Vice Chancellor), GSFC University

It brings me great joy and a fatherly feeling to welcome you all to GSFC University's 3rd convocation ceremony. To begin, I'd want to congratulate all of the award winners and medalists, as well as all of the students who are receiving degrees today.

During the pandemic, the education system underwent significant changes, and the whole idea of academics was altered. At GSFC University, we train our students to flourish in these out-of-the-ordinary circumstances and ever-changing worlds of complexity. Over the years, we've quietly but methodically established a solid faculty foundation with a good balance of academics and industry, which in itself is responsible for giving us the inner strength to deliver high-quality, rigorous, and contextually relevant education.

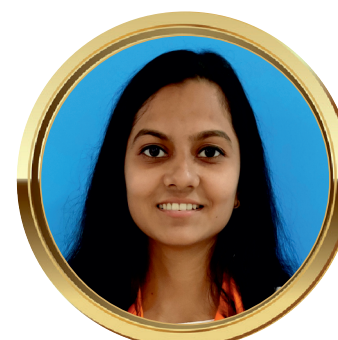

The university has made significant changes in not just the way it teaches but also in the holistic development of its students during the past year and a half. I am ecstatic to report that our students have excelled in the curricular, co-curricular and extra-curricular activities too.

I congratulate my young student friends on their achievements since they have set the way for their juniors to follow in their footsteps. I wish them a great career and life.
